## UCA visits Puerto Rico for 2011 Annual Convention!

New attendee Rodney Drury (Patten)

Over 60 contractor and associate members attended UCA's 2011 Annual Convention in Puerto Rico at the El Conquistador Resort and Spa over the dates of January 23-28, 2011.

The weather was perfect with high temperatures in the 80's and low's in the 70's. Members attended networking dinners and receptions as well as educational seminars. Monday's seminar featured an Insurance Industry Panel consisting of Tim Conlon (Bunker Hill Underwriters), Greg Field (Willis), Glenn Fuerth (Wilson Elser), and Ginger Imes (DS&P Insurance Services, Inc.). UCA's Legislative Affairs Director Scott Dworschak and Vito Loisi (Wolf & Co.) shared their knowledge and experience with attendees at Wednesday's Tax and Legislative Update. Thank you to everyone who participated in this year's educational program!

Highlights of the trip included Tuesday evening's Associates' Shipwrecked Party held at the resort's very own water park. Members came dressed as their favorite shipwrecked characters including multiple Gilligan's Island characters, mermaids, pirates, and a few surprise guests. Congratulations to all the winners of the costume contest: Best Male and Female

Costume went to Larry and Betty O'Neill (Patten Construction Products) as Chuck Noland/Tom Hanks and Willis the Volleyball from Castaway and Best Children's Costume went to Norah Gillogly (Daughter of J.R. and Laura Gillogly of East Jordan Iron Works) as a mermaid.

The farewell event, UCA's President's Dinner, was a night to remember with breathtaking views of the Caribbean Sea, a delicious three-course meal, and lively entertainment. New convention attendee Rodney Drury (Patten Construction Products) was recognized for his wonderful enthusiasm throughout the convention. Convention Chair Jeff Delia (National Concrete Pipe Co.) was honored as 2011's Most Valuable Player (MVP) for his leadership in the role as convention chair over the past five conventions. His commitment to the convention is unprecedented, and UCA looks forward to working with him on future programs.

Thank you to all of the members who participated as attendees or sponsors. As always, your support shows your dedication to UCA and the underground industry. The Annual Convention would not be possible without the generosity of these individuals. For a list of these members, please turn to pages 6 and 7.

Finally, thank you to the Convention Committee for their hard work all year round on this program.

## First Annual Underground Spring Showcase

In November 2010, the membership was surveyed in regards to UCA's networking events. The Events Committee gathered that the majority of members want UCA to offer lower priced events with more continuing education opportunities. These, and many other ideas, have been incorporated into UCA's First Annual **Underground Spring Showcase** coming up on Thursday, April 14th at Signature Events in Woodridge, IL.

The **Underground Spring Showcase** will take place of UCA's Membership Dinner and Trade Show. This year's event offers an extended trade show from 5 p.m. to 8 p.m. Attendees are invited to arrive

early at 4 p.m. for an hour long **FREE** educational seminar hosted by UCA's Continuing Education Committee titled *How to Stay on Top of Receivables and Get Paid*. In lieu of UCA's traditional formal Membership Dinner, food and beverage will be served throughout the exhibition and are included in the attendee ticket price.

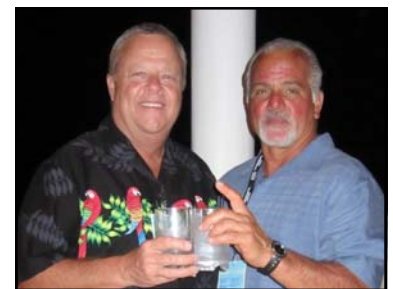

### Additional Bonuses for Contractors Members

Contractors will receive \$25 off each additional ticket after the first registered attendee! Please encourage your superintendents, estimators, and project managers to attend. There is no dress code at the

### 2011 Convention Committee

- Chair Jeff Delia,  
National Concrete Pipe Co.  
Brian Bries, Weible & Cahill  
Ginger Imes,  
DS&P Insurance Services, Inc.  
Lori Jermyn,  
Vulcan Construction Materials  
Brian Klimes, FOCIS Promotions  
Ed Knowles, Knowles Construction  
Todd Larsen, Lee Jensen Sales Co., Inc.  
Bob Bosworth, Elmhurst-Chicago Stone  
Vito Loisi, Wolf & Co.  
Elizabeth Perino,  
Perdel Contracting Corp.  
Debby Piraino, PirTano Construction  
Blair Pipkin, SES, Inc.  
John Scapin, Neslund & Associates  
Stu Senska, Vermeer Midwest

If you are interested in participating on UCA's Convention Committee, please contact UCA Staff.

**Cheers to a job well done!**  
(L to R): UCA's Executive Director Dave Benjamin and Convention Chair Jeff Delia (National Concrete Pipe Co.)

**Underground Spring Showcase** so come after work or from a jobsite! Also, contractor registration includes a **FREE** safety class for one of your employees. Choose from the following classes offered by DS&P Insurance Services:

- Excavation Competent Person Certification
- 10 Hour OSHA Certification
- Flagger Certification
- First Aid/CPR Certification

For more information on this event, please reference the enclosed registration form or visit the Events Section of [www.uca.org](http://www.uca.org).

UCA Pipeline is a publication of the Underground Contractors Association of Illinois. UCA is a non-profit trade association of contractors and suppliers in the sewer, water, utility, and underground industry. UCA is active in market development, information, education, labor, and promotion of safety.

Editorial comments, articles and photographs are welcomed and encouraged. Please contact Amy Wicks, Events and Marketing Coordinator, for more information, (630) 467-1919 or [awicks@uca.org](mailto:awicks@uca.org).

I look at the calendar and find it hard to believe that February is almost over. Time surely does fly but after this winter I must admit that I'm happy to see it going quickly!

While I was unable to join the festivities of the Annual Convention in Puerto Rico, I have heard nothing but GREAT things from all of you that were able to attend. I am so pleased that everyone had a great time. You would have enjoyed it even better if we had the Blizzard of 2011 while you were having fun in the sun! I would like to thank Amy Wicks and the entire Convention Committee for all their hard work in getting everything pulled together to make it such a successful conference. Of course, I want to thank Scott Dworschak for presenting what I heard was an excellent account of what is going on in Springfield and D.C. You will be hearing from the Convention Committee soon as they begin to plan for 2012. I would appreciate everyone's input so we can ensure another very successful event.

While the Associates Committee has paved the way for increased networking amongst members, the Events Committee is continuing the trend. In that light, please make sure that you SAVE THE DATE of April 14th, for UCA's First Annual **Underground Spring Showcase**. I really think members will enjoy the new format and find it most enlightening. It will, as well, provide an opportunity for you

to get more of your field people involved in the networking process. We will be interested in getting your feedback on the new format.

The Construction Materials Committee hosted a wonderful Sewer Rehab Seminar on February 24th. Steve Cieslica of Trotter & Associates has done a wonderful job chairing this committee for the last 3 years, and I would like to take this opportunity to thank him for his hard work and service to the association and the industry.

I would also like to welcome Brad Sanderson from Engineering Enterprises, Inc. to the association as a new member, but also thank him for accepting the position of Chair of the Construction Materials Committee. With his enthusiasm and leadership, we will continue to see great things come from his committee.

As you are aware, we have entered into our agreement with Bunker Hill and look forward to the new Risk Management Committee. Bunker Hill is busy working with UCA staff to get it off the ground and rolling. You will notice in this issue of the Pipeline that Bunker Hill has already started to provide us with information designed to help members reduce their risks on construction sites. We all look forward to growing our working relationship with them.

**Elizabeth Perino, UCA President**  
Perdel Contracting Corp.

I'm excited to report that our State-wide Committee kicked off the year with a bang by providing a seminar on Unfunded Liability to the Peoria-area members. It was great information and was attended by over 30 people. On March 29th, the committee will host a Utility Roundtable at G.A. Rich and Son's Inc.'s new location in Deer Creek, IL. We welcome all to participate!

Here is hoping for a much better spring. I look forward to seeing all of you at our upcoming committee meetings and events.

Sincerely,

**Elizabeth Perino, UCA President**  
Perdel Contracting Corp.

# Safety Angle

## Confined-Spaces

What is a confined space? Is it hard to get in and out of? Is it large enough for a person to enter? Is it designed for people to enter into? Could there be hazardous atmosphere inside the space? Are there other hazards that could exist in the space?

Confined spaces, like manholes, pipes, culverts, vaults, storm sewers, water tanks, lift stations, and pits over 4-ft. deep, are enclosed spaces that:

- Are large enough for a human being to enter into,
- Have a limited or restricted means for entry or exit, and
- Are not designed for continuous occupancy.

Only persons who have been trained in confined-space entry can

work in a confined space. Persons entering into confined spaces must be aware of the potential hazards, the necessary precautions, the use of appropriate personal protective equipment, and what to do in an emergency. Before entering a confined space, you must be authorized to do so by the confined-space entry supervisor. If there is no entry supervisor, check with your foreman.

Before entering, ask yourself the following questions:

- Have you been trained in confined-space entry and are you authorized to enter?
- Is this a permit-required confined space? If yes, did you review the permit?
- Has the atmosphere been tested and is it safe to enter?

- Will you constantly monitor the space?
- Has the space been ventilated and purged with fresh air?
- Have other hazards been identified and controlled or eliminated?
- Do you have the proper personal protective equipment?
- Who is the attendant (standby person) assigned to work with you?
- Are you aware of the emergency procedures? Can you rescue yourself from the space?
- What rescue procedures have been planned?

Before entering a confined space, the atmosphere in the space must be tested with a calibrated gas monitor

to make sure there is enough oxygen and that the air does not contain flammable or hazardous materials. Continuously monitor the air in the space. The space should also be continuously ventilated with fresh air, and all other hazards should be identified and controlled or eliminated. Never enter into a confined space unless you are absolutely sure the space is safe to enter.

If you have any questions, or want to set up a confined space training class, please contact UCA's Safety Consultant Dave Soderman from Safety Alliance, Ltd. at (630) 450-2440.

## UCA's Safety Committee Update

UCA's Safety Committee met February 22, 2011 to continue planning the association's annual safety programs. The committee welcomed participation from Eitel Singleton, Chair of the Greater Chicagoland Damage Prevention Council (GCDPC); Adam Zeciri, Planet Underground's new Illinois Area Trainer; John Rahilly from the Chicagoland Construction Safety Council (CCSC); and Dave Van Wy from JULIE and the Common Ground Alliance (CGA).

The Safety Committee is working on a number of proactive initiatives including publishing Version 2.0 of UCA's Employee Safety Manual, providing Work Zone Traffic Safety Guide information to all UCA Members at no additional cost, planning for their Annual Safety Awards Luncheon, working with OSHA on UCA's Strategic

Partnership Program, working with Bunker Hill Underwriters to organize the new Risk Management program meetings.

### Safety Awards

UCA's Safety Consultant Dave Soderman from Safety Alliance reported that his Task Force has over 20 applications for six categories of safety awards from members. **This award luncheon will be held on May 18th at the Chicagoland Construction Safety Council (CCSC) facility in Hillside, IL.** Tim Conlon from Bunker Hill Underwriters will be featured as a guest speaker and will talk about "How Contractors Can Reduce and Manage Risk."

### Employee Safety Manual

Version 2.0 of the committee's Employee Safety Manual is now

available at UCA. The 40 page manual is a great tool to use when orienting new employees and works great as a safety training record keeping tool as well. UCA appreciated input on this project from the Laborers and Operating Engineer Unions.

### Important Information for UCA's Safety Committee

- Save the date for GCDPC's upcoming free breakfast for excavators & underground contractors set for March 23, 2011 at the University of Illinois's Chicago Campus.
- Visit [www.underspace.com](http://www.underspace.com) for more information on Planet Underground's training material featured in the December Issue of their Underground Focus magazine.

- Visit [www.buildsafe.org](http://www.buildsafe.org) for more information on CCSC's Health Hazards in Construction which was produced with OSHA money from the Susan B Harwood grants.
- Visit [www.illinois1call.com](http://www.illinois1call.com) for more information on JULIE, Inc.'s proposed State-wide Marking Guidelines for facility owners that will help contractors better understand what is marked on future work sites.

If you are interested in any of these topics or have different safety concerns, please consider joining UCA's Safety Committee at their next meeting set for Wednesday, April 20, 2011 starting at 8:00 a.m. in UCA's Itasca offices.

## Sewer Rehab Seminar and Demonstration

On Thursday, February 24th over 80 municipalities, consulting engineers, contractors, and associates attended UCA's Construction Materials Committee's Sewer Rehab event. The seminar featured both discussion and demonstrations on different cost effective methods to reduce infiltration and inflow in sewer systems. The Chicagoland Laborers' Training & Apprenticeship Fund graciously hosted the seminar and demo.

For detailed presentation information, please visit : [www.uca.org](http://www.uca.org).

Thank you to those who volunteered their time, knowledge, and equipment to this very informative seminar:

- Maureen Durkin and Abbas Bhikapurawala, Metropolitan Water Reclamation District of Greater Chicago
- Jeff Freeman, Engineering Enterprises, Inc.
- David Jansa, Chicagoland Laborers' Training Fund
- Tom Woods, Visu-Sewer

- Mike Walsh, Dearborn Companies
- Herb Miller, Michels Pipe Services
- John Manijak, National Power Rodding Corp.
- Kevin Coburn, Insituform Technologies
- Larry Kiest, Jr., LMK Technologies, Inc.

Thank you to the event sponsors:

- Curran Contracting Co.
- Hamilton Kent
- National Power Rodding Corp.
- Rain for Rent
- RJN Group
- Sewer & Tunnel Miners
- Union Laborers' Local 2

Thank you to the Construction Committee Materials Event Chair Steve Cieslica from Trotter & Associates, Inc. Without all of these individuals assistance, this event would not be possible.

Sewer Rehab Seminar held in the Laborers' Chicago Training Center.

UCA Executive Director Dave Benjamin, UCA President Elizabeth Perino, and Administrator of Laborers' Training Center Peter Ruff

Tom Woods (Visu-Sewer) presenting to attendees at the seminar.

Mike Green (Rain for Rent) accompanying information on filtration systems and equipment.

Demonstration provided by Larry Kiest of LMK Technologies, Inc.

Attendees viewing sewer gasket seals.

## UCA Announces Partnership with Bunker Hill

UCA has strategically aligned with insurance and risk management leaders, Bunker Hill Underwriters and Great Midwest Insurance Company to deliver an association sponsored, multi-line insurance program to our industry members.

Bunker Hill Underwriters has over 20 years of successful experience in administration of risk management based insurance programs for heavy construction industry trade groups.

Great Midwest Insurance Company (exclusively underwritten by Bunker Hill) is rated A VII (excellent) by A.M. Best and is a wholly owned subsidiary of Bunker Hill's parent company, Hous-

ton International Insurance Group (HIIG).

Features of this new program:

- Broad insurance coverage for general liability, equipment, automobile, worker's compensation, excess liability.
- Competitive rates with UCA group buying power discounts.
- Open agency distribution for access by all licensed agent/brokers.
- Unique Litigation Containment System Tool Kits for participating members.
- Pro-active/aggressive litigation control-based claims adjusting.

- Risk education platforms in conjunction with UCA workshops.

If you are a contractor and want more information, please call Bunker Hill's Senior Vice President Tim Conlon, at (312) 513-8612 or via email at [tconlon@bhuaic.com](mailto:tconlon@bhuaic.com). If you are a UCA insurance agent or broker and would like more information, please contact Bunker Hill's Executive Vice President Mike Leamanczyk at (312) 629-7604 or via email at [mleamanczyk@bhuaic.com](mailto:mleamanczyk@bhuaic.com)

*Bunker Hill's first installment of UCA's Risk Management is enclosed in this edition of the Pipeline.*

## State Fines Increased

All Second Division Vehicles who operate commercially for construction in the State of Illinois MUST:

1. Display Name of Company in 2" x 1/2" lettering
2. You are exempt if under Section 18C-4701 of the Illinois Commercial Transportation law.

The fine for non-compliance with this law has been increased from \$100 to \$500.

## IEPA Draft CCDD Regulations Released

The Illinois Environmental Protection Agency has released their draft rules for the Clean Construction Demolition and Debris law enacted last year. They are available for your review at: <http://www.epa.state.il.us/land/ccdd/index.html>. This link is also available on the UCA website in the Legislative Section. Those interested have until March 11th to provide initial comments. IEPA officials have asked that individuals work through their respective Associations, like UCA, as much as possible.

### IEPA's Timeline

- **2/17**, Release the draft rule to stakeholder groups and invite comments
- **3/11**, Stakeholder comments due on the draft rule
- **Mid-to-late April**, Release revised draft rule to stakeholder groups and invite comments
- **5/12**, Stakeholder comments due on the revised draft rule
- **6/30**, Finalize proposed rule for sign-off by Illinois EPA Director and the Governor's Office
- **7/30**, File proposal with the Illinois Pollution Control Board

## Illinois Statehouse Update

When the State of Illinois recently raised the income tax 66%, Governor Quinn stated the additional revenues were needed to pay the State's accumulated debt. However, in his recent budget address Governor Quinn announced his plan to sell bonds totaling \$8.7 billion. Unfortunately, Quinn seeks to use \$1.7 billion of these bond revenues to help fund the FY2012 budget and finance new programs and spending. This is only the beginning

of the State's budget process, but it is off to a poor start.

As we reported in the recent UCA Email Update, an Illinois Appellate Court struck down some of the funding sources (about 40%) for the Capital Plan enacted in 2009. Fortunately, Illinois Supreme Court issued an order staying the ruling until they can rule on the matter. Governor Quinn has announced that current projects will continue, and IDOT has

announced they currently have available revenues to fund upcoming lettings. The Capital Plan has multiple funding mechanisms in addition to the specific portion in question, although any funding reduction is being taken seriously and long term funding still needs to be addressed.

We are working with our legislative partners at TFIC and ICIC to monitor this situation and will update you when more information is

available. While members of the Illinois General Assembly are aware of this action, please feel free to contact your local State Senator or State Representative to express the importance of adequately funding a Capital Plan, not only to your business but to the entire Illinois construction industry. To find out who your legislators are, please contact UCA.

## Collectively Bargained Workers' Compensation

We have made several attempts to pass legislation allowing workers compensation changes to be available in the bargaining process. Unfortunately, this idea has met stiff opposition from Trial Lawyers and other interest groups. However, this year, Operators Local 150 have made it a priority. Due to the high cost of the workers' compensation program, the Illinois General Assembly has indicated their desire to

make changes to the current program, and appears more amenable to allowing the collective bargaining process into the mix as well. We are cautiously optimistic hope that results will be different this year and we will be able to join the other 11 states that offer this option to union construction workers. A draft of the most recent proposal is available on UCA's Legislative section of [www.uca.org](http://www.uca.org).

## Bills to Watch with UCA

### HB14 Infrastructure Modernization Act

Allows for public utilities (gas & electric) to adjust their rate structures and create a long term revenue stream to rebuild and update their supply grid system. Should provide billions of dollars of new construction work during the next decade.

### HB 1321 Public Payment Bond

We are a principle supporter of this bill which requires a developer to purchase a payment bond (much like a performance bond, but insures that subs will be paid for their work). The problem has been especially acute in work areas involving public right-of-way where contractors & subs have no lien rights.

### SB 1550 Prevailing Wage for Aggregate/Excavated Transportation Workers

Extends prevailing wage benefits to all laborers, workers, drivers, mechanics engaged in the transportation of aggregate or excavated materials or the operation of equipment to haul aggregate or excavated materials to or from the site of the building or construction job. This bill has become almost an annual event in Springfield. There is no doubt this legislation will increase the cost of most public works projects, and extends benefits to only a certain classification of workers.

## UCA Lobbying Expense Percentage

The lobbying expense percentage for 2010 is 15%. This percentage is calculated by dividing UCA's lobbying expense by the membership dues. In 2009 the expense percentage was 7%. Please contact UCA for additional information.

## Federal Update

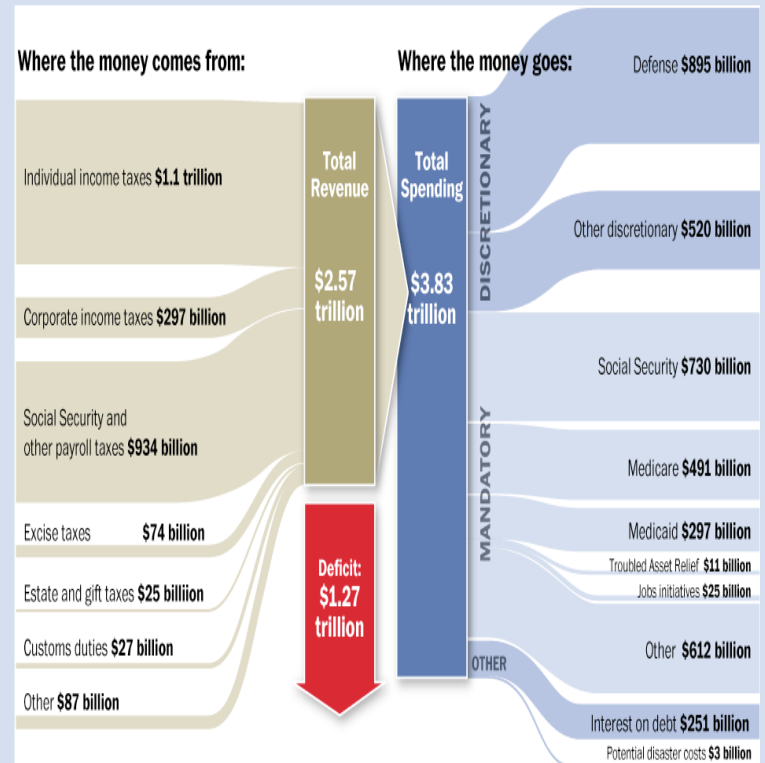

In the current FY2011 budget, nearly 42 cents of every dollar spent is borrowed money. Many new Members of Congress campaigned, and were elected, based upon their position that this overspending had to be reigned in. Now, as Republicans have gained the majority in Congress, they have begun making proposals affecting current and future federal spending.

The majority of federal spending is centered on defense and entitlement programs such as Social Security, Medicare, and Medicaid. These programs are considered more politically sensitive and will most likely require both parties to reach an agreement on the overall future of each before meaningful changes can be made.

That leaves discretionary spending, excluding Defense, at roughly \$520 billion which covers areas such as Health and Human Services, Transportation, Education, Housing and Urban Development, and Environmental Protection.

Discretionary spending also includes programs like the Clean Water Revolving Loan Fund program. Over the past four years we have doubled the funding for this program, mostly through UCA's efforts with our national Clean Water Construction Coalition (CWCC) partners. In light of the overall federal budget crisis, House Republicans have targeted this program, and many others for reduction. In the President's 2012 budget plan, he has announced some spending cuts, although he aims to fund the Clean Water program equal to 2011 outlays. A serious debate regarding spending for this fiscal year, and 2012 is in the works. In the end, both the Congress and the White House will need to reach some sort of overall spending agreement, including finally authorizing (and funding) a new Surface Transportation Plan. We at UCA will continue to lobby our elected officials to provide adequate funding to address our nation's serious infrastructure needs.
